

Program Advisory Committee (PAC) Electrical Techniques

Niagara College is seeking individuals to serve as members of the Program Advisory Committee (PAC) for Electrical Techniques. The role of the PAC is advisory. PACs act as a strong link between industry and the college and members advise the college on the currency, relevancy and quality of its programs. In particular the role of the PAC is to:

- Provide input and feedback on curriculum to ensure that programs are current and relevant to industry needs,
- Advise on industry trends and skills required for industry to prosper
- Assist in identifying experiential learning (co-op, internship, applied research) opportunities for students
- Participate in program quality assurance processes

Meetings: The meetings are held at the college, mostly once a year. Occasionally there would be a need for an additional meeting when the program is under review. Meetings are held at times convenient to the PAC members.

Term: Members are appointed for an initial 3 year term.
